## Context of Decision Making

## Context of Decision Making

- Individual decision making and individual action against nature.
- Example: gambling.

## Context of Decision Making

- Individual decision making and individual action against nature.
- Individual decision making in interaction.
- Example: playing chess.

## Context of Decision Making

- Individual decision making and individual action against nature.
- Individual decision making in interaction.
- Collective decision making.
- Example: carrying a piano, voting

## Main Question

Given a group of people faced with some decision, how should a central authority combine the individual opinions so as to best reflect the "will of the group"?

## Main Question

Given a group of people faced with some decision, how should a central authority combine the individual opinions so as to best reflect the "will of the group"?

Typical Examples:

- Electing government officials
- Department meetings
- Deciding where to go to dinner with friends

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

Brams and Fishburn. Voting Procedures. Handbook of Social Choice and Welfare (2002).

## Which candidate should be chosen?

| \# voters | $\mathbf{3}$ | $\mathbf{5}$ | $\mathbf{7}$ | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$worst | D | C | D | B |
|  | C | B | C | D |
| A | A |  |  |  |

A few observations:

- More people rank $A$ first than any other candidate

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

A few observations:

- More people rank $A$ first than any other candidate
- But, a stronger majority ranks $A$ last

Which candidate should be chosen?

Marquis de Condorcet (1743-1794) Jean-Charles de Borda (1733-1799)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

A few observations:

- More people rank $A$ first than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | B | C | D |
|  | D | A | A |  |

A few observations:

- More people rank $A$ first than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| $\overbrace{\text { worst }}$ | D | B | C | D |
|  | D | A | A |  |

A few observations:

- More people rank $A$ first than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst $^{\text {w }}$ | D | B | C | D |
|  |  | D | A | A |

A few observations:

- More people rank $A$ first than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

A few observations:

- More people rank $A$ first than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)
- $B$ and $C$ are the only candidates not ranked last by anyone

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

A few observations:

- More people rank $A$ first (last) than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)
- Taking into account the entire ordering, $B$ has the most "support" ( $B$ is the Borda winner)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| 3 | A | A | B | C |
| 2 | B | C | D | B |
| 1 | C | B | C | D |
| 0 | D | D | A | A |

A few observations:

- More people rank $A$ first (last) than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)
- $B$ gets $13($ vs. $A)+10($ vs. $C)+21($ vs. $D)=44$ points

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| 3 | A | A | B | C |
| 2 | B | C | D | B |
| 1 | C | B | C | D |
| 0 | D | D | A | A |

A few observations:

- More people rank $A$ first (last) than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)
- $B$ gets 13 (vs. $A)+10$ (vs. C) +21 (vs. $D)=44$ points
$C$ gets $13($ vs. $A)+11($ vs. $B)+14($ vs. $D)=38$ points

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

A few observations:

- More people rank $A$ first (last) than any other candidate
- In pairwise elections, $C$ beats every other candidate ( $C$ is the Condorcet winner)
- Taking into account the entire ordering, $B$ has the most "support" ( $B$ is the Borda winner)

## Which candidate should be chosen?

| \# voters | 3 | 5 | 7 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| best | A | A | B | C |
| $\uparrow$ | B | C | D | B |
| worst | D | D | A | A |

Conclusion: many ways to answer the above question!

## Choosing How to Choose

## Choosing How to Choose

Plurality, Borda Count, Antiplurality/Veto, and k-approval; Plurality with Runoff; Single Transferable Vote (STV)/Hare; Approval Voting; Condorcet-consistent methods based on the simple majority graph (e.g., Cup Rule/Voting Trees, Copeland, Banks, Slater, Schwartz, and the basic Condorcet rule itself), rules based on the weighted majority graph (e.g., Maximin/Simpson, Kemeny, and Ranked Pairs/Tideman), rules requiring full preference information (e.g., Bucklin, Dodgson, and Young); Majoritarian Judgment; Cumulative Voting; Range Voting

[^0]
## Choosing How to Choose

Plurality, Borda Count, Antiplurality/Veto, and k-approval; Plurality with Runoff; Single Transferable Vote (STV)/Hare; Approval Voting; Condorcet-consistent methods based on the simple majority graph (e.g., Cup Rule/Voting Trees, Copeland, Banks, Slater, Schwartz, and the basic Condorcet rule itself), rules based on the weighted majority graph (e.g., Maximin/Simpson, Kemeny, and Ranked Pairs/Tideman), rules requiring full preference information (e.g., Bucklin, Dodgson, and Young); Majoritarian Judgment; Cumulative Voting; Range Voting

[^1]
## Choosing How to Choose

Plurality Vote: Each voter selects one candidate (or none if voters can abstain) and the candidate(s) with the most votes win.

Plurality with Runoff: If there is a candidate with an absolute majority then that candidate wins, otherwise the top two candidates move on to round two. The candidate with the most votes in the second round wins.

## Choosing How to Choose

Approval Voting: Each voter selects a subset of the candidates (empty set means the voter abstains) and the candidate(s) with the most votes win.

Borda Count: Each voter provides a linear ordering of the candidates. The candidate(s) with the most total points wins, where points are calculated as follows: if there are $n$ candidates, $n-1$ points are given to the highest ranked candidates, $n-2$ to the second highest, etc..

How should we judge different social decision methods?

## How should we judge different social decision methods?

- Pragmatic concerns: Is the procedure easy to use? Is it legal? The importance of ease of use should not be underestimated: Despite its many flaws, plurality rule is, by far, the most commonly used method.

## How should we judge different social decision methods?

- Pragmatic concerns: Is the procedure easy to use? Is it legal? The importance of ease of use should not be underestimated: Despite its many flaws, plurality rule is, by far, the most commonly used method.
- Behavioral considerations: Do the different procedures really lead to different outcomes in practice?

## How should we judge different social decision methods?

- Pragmatic concerns: Is the procedure easy to use? Is it legal? The importance of ease of use should not be underestimated: Despite its many flaws, plurality rule is, by far, the most commonly used method.
- Behavioral considerations: Do the different procedures really lead to different outcomes in practice?
- Information required from the voters: What type of information do the ballots convey? Eg., Choosing a single alternative, linearly rank all the alternatives, report something about the "intensity" of preference.

## How should we judge different social decision methods?

- Pragmatic concerns: Is the procedure easy to use? Is it legal? The importance of ease of use should not be underestimated: Despite its many flaws, plurality rule is, by far, the most commonly used method.
- Behavioral considerations: Do the different procedures really lead to different outcomes in practice?
- Information required from the voters: What type of information do the ballots convey? Eg., Choosing a single alternative, linearly rank all the alternatives, report something about the "intensity" of preference.
- Axiomatics: Characterize the different social decision methods in terms of normative principles of group decision making.

## What properties do we want?

## What properties do we want?

- Condorcet Candidate: Always choose the candidate that beats every other candidate in head-to-head elections

## What properties do we want?

- Condorcet Candidate: Always choose the candidate that beats every other candidate in head-to-head elections
- Monotonicity A candidate receiving more support shouldn't make her worse off

## What properties do we want?

- Condorcet Candidate: Always choose the candidate that beats every other candidate in head-to-head elections
- Monotonicity A candidate receiving more support shouldn't make her worse off
- Independence: The winner should not depend on "irrelevant" spoiler candidates

## What properties do we want?

- Condorcet Candidate: Always choose the candidate that beats every other candidate in head-to-head elections
- Monotonicity A candidate receiving more support shouldn't make her worse off
- Independence: The winner should not depend on "irrelevant" spoiler candidates
- The outcome of a vote should not be "surprising" given the data

## Condorcet Paradox

| Voter 1 | Voter 2 | Voter 3 |
| :---: | :---: | :---: |
| A | C | B |
| B | A | C |
| C | B | A |

## Condorcet Paradox

| Voter 1 | Voter 2 | Voter 3 |
| :---: | :---: | :---: |
| A | C | B |
| B | A | C |
| C | B | A |

- Does the group prefer $A$ over $B$ ?

## Condorcet Paradox

| Voter 1 | Voter 2 | Voter 3 |
| :---: | :---: | :---: |
| A | C | B |
| B | A | C |
| C | B | A |

- Does the group prefer $A$ over $B$ ? Yes

## Condorcet Paradox

| Voter 1 | Voter 2 | Voter 3 |
| :---: | :---: | :---: |
| A | C | B |
| B | A | C |
| C | B | A |

- Does the group prefer $A$ over $B$ ? Yes
- Does the group prefer $B$ over $C$ ? Yes

## Condorcet Paradox

| Voter 1 | Voter 2 | Voter 3 |
| :---: | :---: | :---: |
| A | C | B |
| B | A | C |
| C | B | A |

- Does the group prefer $A$ over $B$ ? Yes
- Does the group prefer $B$ over $C$ ? Yes
- Does the group prefer $A$ over $C$ ? No

## Condorcet Paradox

| Voter 1 | Voter 2 | Voter 3 |
| :---: | :---: | :---: |
| A | C | B |
| B | A | C |
| C | B | A |

- Does the group prefer $A$ over $B$ ? Yes
- Does the group prefer $B$ over $C$ ? Yes
- Does the group prefer $A$ over $C$ ? No (this conflicts with transitivity)
W. Gehrlein. Condorcet's Paradox. Springer, 2006.

Failure of monotonicity: plurality with runoff

| \# voters | 6 | 5 | 4 | 2 |  |  |  |  |  |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | C | B | B voters | 6 | 5 | 4 | 2 |  |
|  | B | A | C | A |  |  |  |  | A |
| C | B | A |  |  |  |  |  |  |  |
|  | C | B | A | C |  | B | A | C | B |
|  |  |  | C | B | A | C |  |  |  |

Failure of monotonicity: plurality with runoff

| \# voters | 6 | 5 | 4 | 2 | \# voters | 6 | 5 | 4 | 2 |

## Failure of Independence

| \# voters | 3 | 2 | 2 |
| :---: | :---: | :---: | :---: |
|  | A | B | C |
|  | B | C | X |
|  | C | X | A |
|  | X | A | B |

- The BC ranking is: $A(8)>B(7)>C$ (6)
- Add a new (undesirable) candidate $X$

## Failure of Independence

| \# voters | 3 | 2 | 2 |
| :---: | :---: | :---: | :---: |
|  | A | B | C |
|  | B | C | X |
|  | C | X | A |
|  | X | A | B |

- The BC ranking is: $A(8)>B(7)>C$ (6)
- Add a new (undesirable) candidate $X$
- The new BC ranking is: $C(13)>B(12)>A(11)>X(6)$

## Multiple Elections Paradox

Voters are asked to give their opinion on three yes/no issues:

| $Y Y Y$ | $Y Y N$ | $Y N Y$ | $Y N N$ | $N Y Y$ | $N Y N$ | $N N Y$ | $N N N$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1 | 3 | 1 | 3 | 3 | 0 |

S. Brams, D. M. Kilgour, and W. Zwicker. "The paradox of multiple elections". Social Choice and Welfare, 15(2): 211-236, 1998.

## Multiple Elections Paradox

Voters are asked to give their opinion on three yes/no issues:

| $Y Y Y$ | $Y Y N$ | $Y N Y$ | $Y N N$ | $N Y Y$ | $N Y N$ | $N N Y$ | $N N N$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1 | 3 | 1 | 3 | 3 | 0 |

Outcome by majority vote
Proposition 1: $N(7-6)$
S. Brams, D. M. Kilgour, and W. Zwicker. "The paradox of multiple elections". Social Choice and Welfare, 15(2): 211-236, 1998.

## Multiple Elections Paradox

Voters are asked to give their opinion on three yes/no issues:

| $Y Y Y$ | $Y Y N$ | $Y N Y$ | $Y N N$ | $N Y Y$ | $N Y N$ | $N N Y$ | $N N N$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1 | 3 | 1 | 3 | 3 | 0 |

Outcome by majority vote
Proposition 1: $N(7-6)$
Proposition 2: $N(7-6)$
S. Brams, D. M. Kilgour, and W. Zwicker. "The paradox of multiple elections". Social Choice and Welfare, 15(2): 211-236, 1998.

## Multiple Elections Paradox

Voters are asked to give their opinion on three yes/no issues:

| $Y Y Y$ | $Y Y N$ | $Y N Y$ | $Y N N$ | $N Y Y$ | $N Y N$ | $N N Y$ | $N N N$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1 | 3 | 1 | 3 | 3 | 0 |

Outcome by majority vote
Proposition 1: $N(7-6)$
Proposition 2: $N(7-6)$
Proposition 3: $N(7-6)$
S. Brams, D. M. Kilgour, and W. Zwicker. "The paradox of multiple elections". Social Choice and Welfare, 15(2): 211-236, 1998.

## Multiple Elections Paradox

Voters are asked to give their opinion on three yes/no issues:

| $Y Y Y$ | $Y Y N$ | $Y N Y$ | $Y N N$ | $N Y Y$ | $N Y N$ | $N N Y$ | $N N N$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1 | 3 | 1 | 3 | 3 | 0 |

Outcome by majority vote
Proposition 1: $N(7-6)$
Proposition 2: $N(7-6)$
Proposition 3: $N(7-6)$
But there is no support for NNN!
S. Brams, D. M. Kilgour, and W. Zwicker. "The paradox of multiple elections". Social Choice and Welfare, 15(2): 211-236, 1998.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

Voters 4 \& 5 support the outcome on a majority of issues
G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

Voters 4 \& 5 support the outcome on a majority of issues
G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

Voters 4 \& 5 support the outcome on a majority of issues
G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

Voters 4 \& 5 support the outcome on a majority of issues
Voters $1,2 \& 3$ do not support the outcome on a majority of issues
G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## Anscombe's Paradox

|  | Issue 1 | Issue 2 | Issue 3 |
| :---: | :---: | :---: | :---: |
| Voter 1 | Yes | Yes | No |
| Voter 2 | No | No | No |
| Voter 3 | No | Yes | Yes |
| Voter 4 | Yes | No | No |
| Voter 5 | Yes | No | Yes |
| Majority | Yes | No | Yes |

Voters 4 \& 5 support the outcome on a majority of issues
Voters $1,2 \& 3$ do not support the outcome on a majority of issues

A majority of voters do not support the majority outcome on a majority of issues.
G. E. M. Anscombe. On Frustration of the Majority by Fulfillment of the Majority's Will. Analysis, 36(4): 161-168, 1976.

## What properties do we want?

- Condorcet Candidate: Always choose the candidate that beats every other candidate in head-to-head elections
- Monotonicity A candidate receiving more support shouldn't make her worse off
- Independence: The winner should not depend on "irrelevant" spoiler candidates
- The outcome of a vote should not be "surprising" given the data

## Sen's Liberal Paradox

Two members of a small society Lewd and Prude each have a personal copy of Lady Chatterley's Lover, consider

## Sen's Liberal Paradox

Two members of a small society Lewd and Prude each have a personal copy of Lady Chatterley's Lover, consider

I: Lewd reads the book;
$p$ : Prude reads the book;
$I \rightarrow p$ : If Lewd reads the book, then so does Prude.

## Sen's Liberal Paradox

## Sen's Liberal Paradox

Lewd desires to read the book, and if he reads it, then so does Prude (Lewd enjoys the thought of Prude's moral outlook being corrupted)

## Sen's Liberal Paradox

Lewd desires to read the book, and if he reads it, then so does Prude (Lewd enjoys the thought of Prude's moral outlook being corrupted)

Prude desires to not read the book, and that Lewd not read it either, but in case Lewd does read the book, Prude wants to read the book to be informed about the dangerous material Lewd has read.

## Sen's Liberal Paradox

## Sen's Liberal Paradox

|  | $l$ | $p$ | $l \rightarrow p$ |
| :---: | :---: | :---: | :---: |
| Lewd | True | True | True |

## Sen's Liberal Paradox

|  | $l$ | $p$ | $l \rightarrow p$ |
| :---: | :---: | :---: | :---: |
| Lewd | True | True | True |
| Prude | False | False | True |

## Sen's Liberal Paradox

|  | $l$ | $p$ | $I \rightarrow p$ |
| :---: | :---: | :---: | :---: |
| Lewd | True | True | True |
| Prude | False | False | True |

1. Society assigns to each individual the liberal right to determine the collective desire on those propositions that concern only the individual's private sphere I is Lewd's case, $p$ is Prude's case

## Sen's Liberal Paradox

|  | $l$ | $p$ | $I \rightarrow p$ |
| :---: | :---: | :---: | :---: |
| Lewd | True | True | True |
| Prude | False | False | True |

1. Society assigns to each individual the liberal right to determine the collective desire on those propositions that concern only the individual's private sphere I is Lewd's case, $p$ is Prude's case
2. Unanimous desires of all individuals must be respected.

## Sen's Liberal Paradox

|  | $l$ | $p$ | $I \rightarrow p$ |
| :---: | :---: | :---: | :---: |
| Lewd | True | True | True |
| Prude | False | False | True |

1. Society assigns to each individual the liberal right to determine the collective desire on those propositions that concern only the individual's private sphere I is Lewd's case, $p$ is Prude's case
2. Unanimous desires of all individuals must be respected.

So, society must be inconsistent!
